

INTRODUCTION OF UI/UX

User Interface/user Experience

DEFINITION

USER INTERFACE

- ▶ It is the visual part of an application, website, or software that users interact with.
- ▶ **Example:** In a booking app, the search bar, "Book Now" button, and destination cards are all part of the UI.

USER EXPERIENCE

- ▶ It is the overall experience a user has while using a product or service.
- ▶ **Example:** In a booking app, making it easy for users to search, select dates, pay, and receive confirmation without confusion is good UX.

UI vs UX

UI (User Interface)	UX (User Experience)
➤ Focuses on the visual appearance of a product. ➤ Concerned with colors, buttons, icons, fonts, and layouts. ➤ Deals with how the product looks. ➤ Makes the interface attractive and interactive. ➤ Designed by UI Designers. ➤ Includes screens, menus, and visual elements. ➤ Goal is to create an appealing interface. ➤ Example: Designing a "Book Now" button.	➤ Focuses on the overall user experience. ➤ Concerned with usability, accessibility, and user satisfaction. ➤ Deals with how the product works and feels. ➤ Makes the product easy and enjoyable to use. ➤ Designed by UX Designers. ➤ Includes user research, wireframes, and user flows. ➤ Goal is to solve user problems efficiently. ➤ Example: Ensuring users can complete a booking quickly and easily.
